Ihab Mahmoud

Front-end Developer

Mansoura, Egypt ehabmah6969@gmail.com +01123242977 in/profile portfolio.com

Summary

Frontend Developer with **2+ years** of experience engineering high-performance e-commerce and SaaS platforms. Proven track record of **reducing** booking abandonment by **30%** and delivering **scalable UI** architectures using **Angular** and **React**. Adept at bridging complex backends **(.NET)** with seamless, high-converting user interfaces.

EXPERIENCE

Frontend Developer | Tegrow (Part-Time)

July 2025 - Present, **Mansoura, Egypt** (Remote)

- Built a **scalable customer portal and full-featured backoffice admin system** for a tourism platform, enabling booking, tracking, payments, and account management for both guests and registered users.
- Developed complex **admin dashboards and management panels** to control orders, payments (full & partial), vehicles, destinations, users, reviews, FAQs, and static content with advanced filtering, validation, and reporting capabilities.
- Implemented **dynamic booking flows and data-driven UI logic**, including real-time pricing scenarios, order status tracking, multi-step forms, and role-based admin workflows to support high operational accuracy.
- Collaborated within an **Agile environment** to translate detailed business requirements into maintainable, production-ready UI solutions, ensuring usability, scalability, and alignment with business operations.

Pro UI Developer | Azzrk (Full-Time)

June 2025 - Jan 2026, **Mansoura, Egypt** (on-site)

- Built, customized, and debugged **Salla & Zid e-commerce themes**, delivering responsive, high-performance UIs while strictly following platform and company development guidelines.
- Researched, designed, and implemented **theme features and UI components** that improved code quality, reusability, accessibility, and overall customer experience.
- Increased development speed using tools such as **Codi (dynamic component generation)**, **Salla Icons Search**, platform debugging tools, and automation utilities to reduce turnaround time.
- **Won an internal innovation challenge (30+ developers)** by delivering ideas that improved theme quality, development efficiency, and scalability across multiple stores.

UI Developer | Hafah (Part-Time)

May 2024 - June 2025, **Riyadh, Saudi Arabia** (Remote)

- Implemented responsive UI components consuming RESTful APIs (via .NET backends), ensuring strict adherence to WCAG accessibility standards.
- Built modular, reusable Angular components and templates (standalone components, @Component templates, and scoped SCSS) to improve maintainability and accelerate feature delivery.
- UI Integrations & UX Enhancements: Integrated third-party UI libraries (Swiper, ngx-toastr, ngx-spinner, ng-inline-svg-2, ngx-translate, ngx-echarts) to provide rich interactions, notifications, internationalization, and data visualization.
- Agile Collaboration: Applied agile methodologies to streamline project management, enhance cross-functional collaboration, and deliver iterative UI improvements with emphasis on accessibility and consistent design patterns.

UI Developer | Posty-5 (Part-Time)

Aug 2024 - February 2025, **Cairo, Egypt** (Remote)

- Designed and implemented the **responsive frontend UI for Posty5.com**, a multi-tool web platform, using **Angular, HTML5, and SASS**, ensuring seamless user experience across devices and tools like URL shortener, QR code generator, and SEO extractor.
- Structured and optimized reusable UI components to support **scalable tool integration**, enabling consistent interactions across modules such as link management, analytics interfaces, and generator utilities.
- Ensured high **cross-browser compatibility, performance, and accessibility**, reducing rendering issues and improving user satisfaction on both desktop and mobile environments.
- Collaborated in an **Agile/Scrum development process**, driving iterative UI enhancements, improving user workflows, and delivering incremental feature updates with efficient team coordination.

PROJECTS

Eastern Tourism – Tourism Booking Platform (Portal & Admin Dashboard)

Project Link:(Not finished yet)

- Designed and optimized a **multi-service tourism platform** (transportation & flight booking), reducing **booking abandonment by ~30%** and cutting **admin order-processing time by ~40%** through simplified UX flows, dynamic forms, and a unified backoffice interface.

Hafah

Project Link: (Not finished yet)

- I led the end-to-end UI development for the Hafah startup ecosystem as the sole frontend developer, building and launching four Angular applications from scratch: a User Portal, Backoffice Admin System, Merchant Dashboard, and a Landing Page.
- I designed and implemented a scalable frontend architecture, delivering responsive, pixel-perfect interfaces for both B2B and B2C platforms, and created a unified HTML/CSS email template system to support diverse business workflows.

Posty-5 – All-In-One Web Tools Platform

Project Link: posty5

- Designed and optimized the **UI of a multi-tool web platform** (URL shortener, QR/code tools, SEO utilities), increasing **user engagement by ~25%** and reducing **page interaction latency by ~35%** through responsive, reusable UI components and streamlined interaction flows.

EDUCATION

Bachelor of Computer and Information Science | Mansoura University

Egypt, 2025

SKILLS

Frontend Development: HTML5, CSS3, JavaScript, TypeScript, SASS, React.js, Angular, Next.js, Redux.

UI & Styling Frameworks: Tailwind CSS, Bootstrap, Responsive Design, Component-Based Architecture.

Tools & Workflow: Firebase, Git, GitHub, Visual Studio Code, Agile Development(Jira & trello).
