Ihab Mahmoud

Front-end Developer

Mansoura, Egypt ehabmah6969@gmail.com +01123242977 in/profile portfolio.com

Summary

Frontend Developer with **2+ years of experience** building scalable web applications, SaaS platforms, e-commerce solutions, booking systems, and admin dashboards using **Angular, React, TypeScript, JavaScript, HTML, and SCSS/SASS**. Strong expertise in **reusable UI architecture, REST API integration, responsive design, accessibility, internationalization, and RTL/LTR interfaces**. Experienced in translating complex business requirements into polished, maintainable user experiences and delivering production-ready solutions within Agile teams.

EXPERIENCE

Frontend Developer | Tegrow (Part-Time)

July 2025 - Present, **Mansoura, Egypt** (Remote)

- Built a **scalable customer portal and full-featured backoffice admin system** for a tourism platform, enabling booking, tracking, payments, and account management for both guests and registered users.
- Developed complex **admin dashboards and management panels** to control orders, payments (full & partial), vehicles, destinations, users, reviews, FAQs, and static content with advanced filtering, validation, and reporting capabilities.
- Implemented **dynamic booking flows and data-driven UI logic**, including real-time pricing scenarios, order status tracking, multi-step forms, and role-based admin workflows to support high operational accuracy.
- Collaborated within an **Agile environment** to translate detailed business requirements into maintainable, production-ready UI solutions, ensuring usability, scalability, and alignment with business operations.

UI Developer | Azzrk · Hafah · Posty-5

May 2024 - Jan 2026 | Remote & On-site — Mansoura, Egypt / Riyadh, Saudi Arabia / Cairo, Egypt

- Developed and maintained **responsive, production-ready UIs** across e-commerce, SaaS, and business platforms using **Angular, HTML5, SCSS/SASS, JavaScript/TypeScript**, and modern UI libraries.
- Built and customized **Salla & Zid e-commerce themes**, following platform and company development guidelines while delivering reusable, accessible, and high-performance interfaces across multiple stores.
- Developed **modular Angular components and reusable UI templates** integrated with RESTful .NET APIs, improving maintainability, consistency, and development speed across multiple applications.
- Implemented rich UI functionality using libraries and tools including **Swiper, ngx-toastr, ngx-spinner, ngx-inline-svg, ngx-translate, and ngx-echarts**, covering interactions, notifications, internationalization, and data visualization.
- Designed and implemented the frontend for **Posty5**, a multi-tool SaaS platform featuring URL shortening, QR generation, SEO tools, analytics, and content management, with scalable UI architecture supporting multiple tools and workflows.
- Applied **responsive design, WCAG accessibility principles, cross-browser compatibility, RTL/LTR localization, and performance optimization** to deliver consistent experiences across desktop and mobile devices.
- Improved development efficiency through internal tools including **Codi for dynamic component generation, Salla Icons Search, debugging utilities, and automation workflows**, reducing repetitive implementation and debugging effort.
- Collaborated within **Agile/Scrum teams**, working with designers, backend developers, and product stakeholders to deliver iterative UI improvements and maintain consistent design patterns.
- **Won an internal innovation challenge among 30+ developers** by proposing and implementing solutions that improved theme quality, development efficiency, and scalability across e-commerce projects.

PROJECTS

AR Chess Academy – Online Chess Training Platform

Project Link: AR Chess Academy

- Developed a **modern multilingual chess training platform** connecting students with professional coaches through structured programs, private sessions, subscriptions, and performance tracking.

- Built responsive **student and coach experiences** with session management, homework, coach notes, attendance, performance reports, and subscription tracking, streamlining the complete learning workflow.

- Implemented **secure authentication, role-based access, and payment flows** supporting multiple user types and online subscription purchases.
- Developed reusable, scalable frontend components with **English/Arabic localization and RTL/LTR support**, delivering a consistent experience across desktop and mobile devices.

Eastern Tourism – Tourism Booking Platform (Portal & Admin Dashboard)

Project Link: Eastern Tourism

- Developed a **full-featured tourism booking platform** for limousine transportation and flight reservations, with customer portal and administrative backoffice workflows for managing bookings, payments, vehicles, destinations, users, and service operations.
- Built dynamic **limousine booking flows** with route selection, passenger capacity, vehicle selection, round-trip support, and distance-based pricing using Google Maps services.
- Implemented **flexible payment workflows** supporting full and partial payments through PayTabs, with payment status tracking, remaining balances, invoices, and booking confirmation.
- Developed **real-time booking/order tracking and status management**, allowing customers to monitor their requests while enabling administrators to process and update bookings through the backoffice.
- Integrated **flight booking capabilities and PNR-based reservations**, alongside customer notifications, reviews, and responsive multilingual interfaces for a complete end-to-end travel experience.

TeGrow – Digital Growth & Software Development Platform

Project Link: TeGrow

- Developed a **modern, responsive corporate website** for a digital growth and software development company, translating business services and growth-focused messaging into a polished, conversion-oriented user experience.
- Built **interactive and reusable UI sections** including hero sliders, service/content sections, contact forms, and responsive navigation, ensuring consistent UX across desktop and mobile devices.
- Implemented **multilingual support (Arabic/English)** with RTL/LTR layout considerations, providing a localized experience for different target audiences.
- Optimized the frontend for **performance, responsiveness, and maintainability**, using reusable components and structured styling to streamline future content and feature updates

Posty5 – Digital Tools & Social Media Platform

Project Link: posty5

- Built a **multi-tool SaaS platform** combining URL shortening, QR codes, SEO analysis, HTML hosting, landing-page creation, and social media publishing into a unified digital workspace.
- Developed reusable **dashboard and analytics interfaces** for managing digital assets, tracking engagement, and monitoring publishing activity across multiple platforms.
- Implemented **OAuth-based social integrations and multi-platform publishing workflows**, including account management, platform-specific configuration, content review, and real-time status tracking.

EDUCATION

Bachelor of Computer and Information Science | Mansoura University

Egypt, 2025

SKILLS

Frontend Development: HTML5, CSS3, JavaScript, TypeScript, SASS, React.js, Angular, Next.js, Redux.

UI & Styling Frameworks: Tailwind CSS, Bootstrap, Responsive Design, Component-Based Architecture.

Tools & Workflow: Firebase, Git, GitHub, Visual Studio Code, Agile Development(Jira & trello).
